

Housing and garage doors

Aluminum and PVC carpentry for housing and shops

Description

Wide range of front doors in all styles: classic, modern, rustic, avant-garde etc.

Both entry doors and garage doors are constructed of a body panel high-quality, high insulation, consisting of a core of high density polyurethane and double sheet of aluminum (entry doors) or steel (garage or business doors).

Technical characteristics

- Different finishes and lacquers.
- Entrance doors with wide range of models. Some of them also glazed sections in different finishes: grids, lead, etc.
- Garage doors of different finishes and openings: rolling, tilting or sectional.
- garage doors can include windows and/or pedestrian door.
- Garage doors/trade doors with self-locking system prevents largely positive break from the outside.
- Panel sheets, extruded aluminum, micro perforated profile etc.
- Decorative accessories (handles, knobs etc.) with different finishes (stainless steel, brass, nickel, aluminum, hardy etc.)
