

Farrowing crate mod. Balance

Maternity cages (farrowing crates)

Description

Farrowing crate mod. Balance. Front beam to avoid crushing. Bottom protective bars "fingers".

Farrowing crate mod. Balance can be considered an evolution of the farrowing crate mod. 018 in which, on the basis of its structure, we add a mobile swing still maintaining the protective bars "fingers" at the bottom.

Materials

Tube 33,7x2,3.

Tube 28x2.

Technical characteristics

- Adjustable rear swing that provides an adequate seating area to the sow.
- Protective bars "fingers" at the bottom.
- Ability to modify length and/or width.
- Extra arc by mounting kit installable at any time.
- No cuts or sharp edge.
- Black or galvanized finish.
- Front feeder stainless steel, PVC, Hopper, anchored to wall etc.
- Hinged backdoor for easy opening rod left or right hand.
- Security lock.
- Cheaper version available reducing the thickness of the tube.
- Different grid anchoring options.
- Consult the possibility of particular applications.
