

Gestation stall 022

Gestation stalls

Description

The gestation stall 022 is a versatile one. Looks for ease of use and design with a predominance of vertical bars.

Vertical bars' body and elevated back door.

Front part adjustable to different needs.

Materials

Plate 30x8; smooth solid Ø14

Technical characteristics

Ready to fix a stainless steel elevated run trough.

Top bars adjustable position.

Elevated back door with double reinforcement in the arms, and safety closure with spring lock.

Back lock integrated (without separable parts that can get lost).

Front side adaptable to different needs.
